Education

Manipal Institute of Technology (MIT)

B.Tech Computer Science (AIML)

CGPA: 9.65/10

2023 – 2027

Karnataka

Apeejay School, Panchsheel Park (CBSE)

Class XII - 94.8%

Class X - 96.4%

2009 – 2023

New Delhi

Skills

- **Languages:** C, C++, Java, Python, SQL, MongoDB, Jinja
- **Web Development:** HTML, CSS, JavaScript, Bootstrap, TailwindCSS, ExpressJS, React, NodeJS, NextJS, Django
- **Machine Learning:** Pandas, NumPy, Matplotlib, PyTorch, TensorFlow, OpenCV, Scikit-Learn
- **Tools:** Git, JupyterNB, Vercel, Render, Docker, Postman, PySpark, MPI, CUDA, Hadoop, Airflow, Airbyte, DBT
- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management, Operating Systems, Big Data Analytics, Machine Learning, Neural Networks, Deep Learning, Computer Vision, Artificial Intelligence

Experience

Kenvue

May 2026 - Jul 2026

Enterprise Integration Engineer (Airflow, Airbyte, DBT, Python, NodeJS, ReactJS)

🌐 Kenvue

- Automated **Excel-driven Airbyte connections and Airflow DAGs** via APIs, eliminating manual task creation.
- Built a reusable **DAG factory**, reducing orchestration code from **500 to 170 lines** with scalable connection reuse and schema-driven configuration.
- Built a full-stack **Airbyte observability dashboard** using **React, TypeScript, Node.js**, monitoring connection health and job metrics.
- Achieved **97.61% statement / 98.31% line coverage** across **92 tests**, integrating Jest, SonarQube, ESLint, and CI/CD.

Guestasy

May 2025 - Oct 2025

Full Stack Developer (MongoDB, ExpressJS, ReactJS, NodeJS)

🌐 Guestasy

- Built **schema-driven Add Property forms** with validation, reducing manual errors by **80%**.
- Created a **dynamic JSON editor** with real-time inline editing, supporting **nested fields**, arrays, and **change tracking**.
- Integrated **editor metadata** and **field-level diffs** for audit logging in a separate MongoDB cluster.

Projects

Movie SVD Recommendation System - Flask, ReactJS, Scikit-Learn 🌐 Movie

Dec 2025

- Built an end-to-end **movie recommendation platform** on the **MovieLens dataset**, combining **SVD collaborative filtering**, **TF-IDF genre features**, **item-item cosine similarity**, and **popularity priors**.
- Developed an offline **training and evaluation pipeline** with mean-centered ratings, **leave-2-out hyperparameter search**, serialized model artifacts, and benchmarks across **RMSE, MAE, Precision, Recall, NDCG, diversity, and novelty**.
- Designed a **cold-start onboarding flow** where new users rate **15 movies**, aggregating preferences into weighted similarity scores for personalized recommendations without historical data.
- Implemented a **Flask REST API** and **React/MUI frontend** with TMDB poster enrichment and caching, supporting sample-movie, existing-user, new-user, and evaluation endpoints.

GitThatOffer - NextJS, NextAuth, MongoDB, TailwindCSS 🌐 GitThatOffer

Jul 2025

- Engineered a **comprehensive job portal platform** serving **100+ students** with smart eligibility filtering on CGPA, branch, and backlogs, improving job discovery efficiency by **70%**.
- Implemented **AI-powered PDF extraction system** using **Google Gemini API** to automatically parse company details, deadlines, and requirements from job postings, reducing manual data entry by **90%**.
- Built **automated email notification system** using **Nodemailer** and **cron-based scheduling** to deliver deadline reminders, welcome emails, and opportunity alerts and reducing missed deadlines by **75%**.
- Developed **comprehensive admin dashboard** managing **20+ companies** with real-time analytics, user engagement metrics, and automated eligibility checking, streamlining recruitment workflow and reducing administrative overhead.

TypeManipalMT – NextJS, NextAuth, MongoDB, TailwindCSS 🌐 TypeManipal

Jun 2025

- Built a **typing stats tracker** for Manipal students with **300+ registered users** and **real-time leaderboards**.
- Integrated **Discord OAuth** and **score scraping**, enabling **category-wise performance sync**.
- Verified users via **institute emails**; built dashboards for tracking **accuracy, speed, and performance trends**.
- Optimized **MongoDB aggregation queries**, reducing **leaderboard load time by 60%**.
- Handled user session persistence and page-level auth using **NextAuth.js** and server-side rendering in Next.js.
